

THE GLOBAL PRE

The Global Pre is a compact, high-quality electrostatic microphone preamplifier body. It is designed to be used with vintage German-made M-series interchangeable capsule heads, as well as B-series and VIN-series interchangeable heads made by JZ in Latvia. The Global Pre is an alternative to expensive historical vacuum tube microphone preamplifiers and fully meets today's high-resolution audio recording demands. The electronics are phantom powered with a linear Class 'A' discrete solid-state transformerless design to provide extremely low self-noise and distortion. Polar patterns and applications fully depend on which capsule head is used (capsule heads not included).

The Global Pre provides a low-impedance, balanced output on a 3-pin XLR connector with gold-plated pins. It comes in a wooden box and includes the GSM compact studio shock mount.
